## An All-Inclusive Fusion Splicer Cleaning Kit

Having an all-inclusive cleaning kit for fusion splicing components is about more than simplifying your process. It's about saving time and money by ensuring maximum-efficiency fiber optic connectivity from the start.

The CK-02 provides cleaner and wipes for fiber preparation, a wet-cleaning option for stubborn debris, and precision swabs for cleaning fusion splicers and cleavers. It also includes an IBC (In Bulkhead Cleaner) that cleans out-of-reach connectors inside the adapter bulkhead. The IBC utilizes a simple pushing motion to guide a disposable dry-cleaning cloth through the connector end face that gently removes dust. You'll also find an optipop cassette cleaner, specifically for MPO (Multi-Fiber Push On) connectors and connector end faces. This refillable device uses a tightly-woven cloth to remove debris from these components.

Our goal with the CK-02 is to provide flexibility according to application. There are many moving parts in fiber optics, and this kit is designed to address any type of problem that could arise, including equipment preparation, fiber preparation, connector end face cleanliness and in-bulkhead contamination.

### CK-02

#### KIT INCLUDES:

ITEM	QUANTITY	DESCRIPTION
1	1	Bag, 9x8x3 Zippered
2	1	Swabs, package of 25
3	1	AquaKleen Cleaner, 2 fl oz bottle
4	1	FiberKleen Wipes, pk of 50 wipes
5	2	IBC-SC
6	2	IBC-LC
7	1	Optipop-R
8	1	Instruction Sheet
9	1	Zipper Pull
